Re: Air Quality Intent to Approve
Site Construction of the Escalante
Silver Mine Near Enterprise,
Utah (Your NIC Dated 5/14/80)

Dear Mr. Welch:

Ernest C. Bradford

Plans and specifications for your proposal to construct the Escalante Silver Mine and surface operations near Enterprise in Iron County have been evaluated and have been found to be consistent with the requirements of the Utah Air Conservation Regulations and the Utah Air Conservation Act.

cc: Southeastern District Health Dept.

The Executive Secretary published notice of intent to issue an approval order in the Salt Lake Tribune and Deseret News on July 1, 1980.

A thirty-day period following the publishing date will be allowed during which your proposal and the Executive Secretary's evaluation of the impact on air quality will be available for review and comment. If within 15 days of publication of notice anyone so requests, a hearing will be held. All comments received including those from the company will be evaluated and a final determination will be made by the Executive Secretary.

You may not proceed with any of the proposed construction or installation of the air pollution sources or control facilities until you have received an approval from the Executive Secretary. The proposed conditions upon which the approval will be given are:

1. Control facilities shall be installed, operated and maintained as proposed and per manufacturer's specifications.
2. Crushing and concentrate dryer emissions shall be vented to scrubbers as proposed. Exhaust emissions shall not exceed 20% opacity.
3. Stack exhaust from bucking/sampling preparation, reagent storage, laboratory fume cabinets, atomic adsorption table operations shall not exceed 20% opacity.

4. Fugitive emissions from processing shall not exceed 20% opacity.
5. Mine haul/access roads and operational areas shall be stabilized with water or other chemical retardant as dry conditions warrant or as required necessary by the Executive Secretary.
6. Stockpile unloading operation and stockpiles shall be stabilized with water or other chemical retardant as dry conditions warrant or as required necessary by the Executive Secretary.
7. A record/log of the stabilizing done to include type, amount, date, and location shall be maintained and be available to the Executive Secretary.

SUBJECT: 27-100-Subsistence; 27-100-Subsistence; 27-100-Subsistence

Sincerely,

Signed

Brent C. Bradford
Executive Secretary

Utah Air Conservation Committee

The first year of business and the reports are summarized as follows:
